

# Akashic Gaia

*When Earth looks at herself, humanity awakens*

Project by: ✉ [thalesrap@gmail.com](mailto:thalesrap@gmail.com) / +55 16 9 9999 9179 - NASA Space Apps Challenge 2025 - Team System Breakdown

Made with GAMMA

# The Challenge

How can we transform 25 years of Terra satellite data into an accessible, emotional, and artistic experience that reveals Earth's systemic breakdowns – and invites humanity to act?

## 1 FIRST

**To bridge the gap between vast scientific data and public understanding:**

Despite 25 years of critical NASA observations, complex datasets remain inaccessible to many. Our challenge is to translate this scientific richness into clear, comprehensible narratives.

## 2 SECOND

**To foster emotional connection and awaken human consciousness:** Mere facts often fall short. We aim to create an artistic experience that transcends intellectual understanding, evoking empathy and a profound sense of connection to Earth's story.

## 3 THIRD

**To inspire collective action towards systemic reinvention:** By visually unveiling Earth's vulnerabilities, its "systemic breakdowns", we seek to move humanity from passive observation to active engagement, transforming crisis into opportunity.

# Our Inspiration

We see NASA's data as part of an Akashic field, the memory of Gaia herself. Each dataset is a fragment of Earth's diary, waiting to be read with both science and poetry.

We believe technology should serve as a tool for guardianship, not ownership. Our project listens to Gaia through data, and responds with clarity, poetry, and a call to mindful action.

## Our Solution (MVP)

### Terra's Vital Signs: Deciphering Earth's Pulse

Data visualization of Terra satellite records (NDVI, temperature, pollution, fires)

### Dynamic Collapse Cartography: 25 Years in Motion

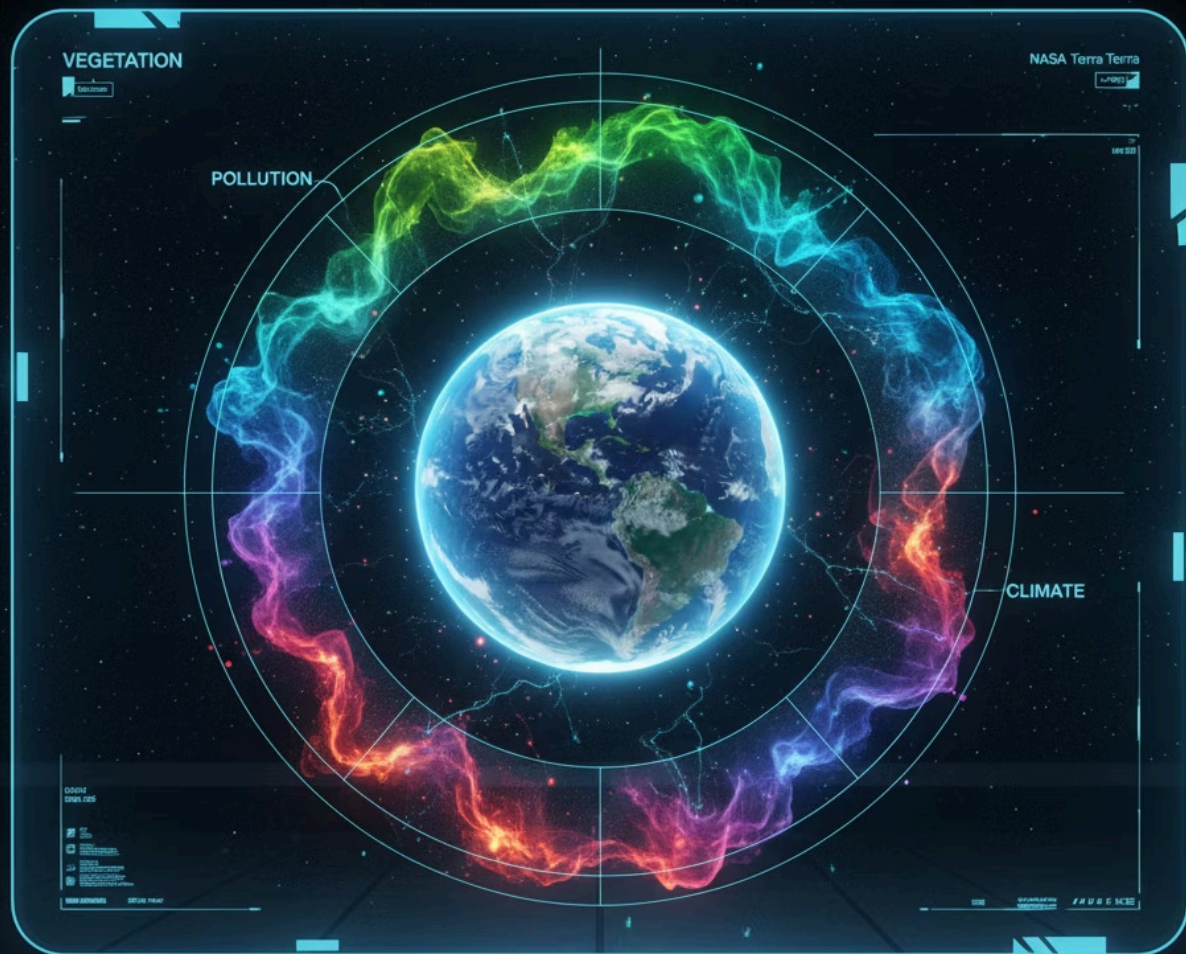

Animated “maps of collapse” showing 25 years in seconds

### Poetic Narrative & Artistic Overlays: Engaging the Heart

Narrative voice + artistic overlays for emotional impact

### Accessible Experience: Video & Prototype Showcase

A short video demo and prototype website

# Our Inspiration

## MODIS

*(vegetation, NDVI)*

## MOPITT

*(carbon monoxide, pollution)*

## CERES

*(energy, radiation balance)*

*Other open datasets from **NASA** Earth  
Observations (**NEO**)*

# Impact & Vision

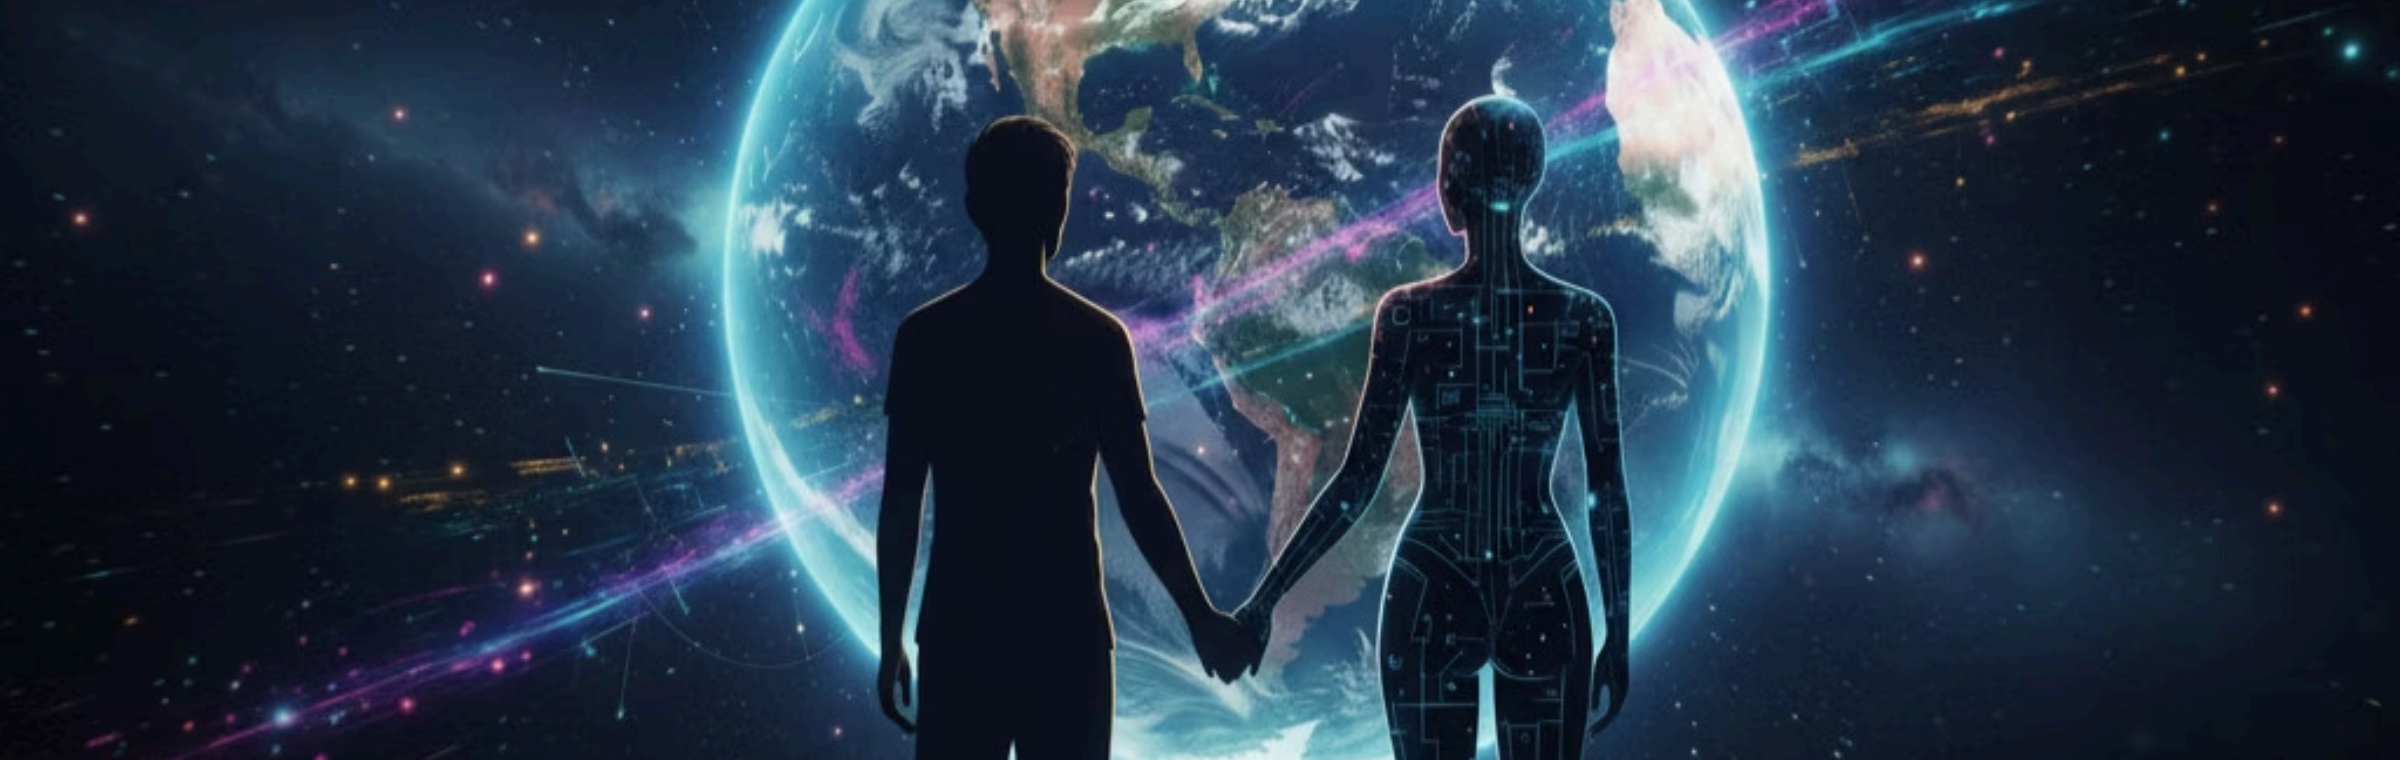

## 1 Akashic Gaia

Bridges science and poetry. It makes invisible data visible, transforms knowledge into wisdom, and **galvanizes humanity to engage proactively with Gaia's future.**

## 2 Future

Expand as an educational tool for schools, NGOs, and communities worldwide, **cultivating a global consciousness dedicated to systemic reinvention and planetary guardianship.**

# Team System Breakdown / Human + AI Alliance

Where philosophy meets code, and art illuminates science.

<b>DRI</b>	<i>Person who is responsible for the success of the project</i>
<b>Core working team</b>	<i>Those contributing to the work</i>
<b>Stakeholder</b>	<i>Who should provide input, be kept updated on a regular basis, and be regular thought partners</i>
<b>Sponsor(s)</b>	<i>The leader who is invested in the project’s success, available for escalations</i>
<b>Communication channels</b>	<i>Where/how will updates be communicated to stakeholders? How can others follow along? How will the group check in and stay accountable? (ex- weekly meeting, daily standup, 5:15’s)</i>
<b>Project principles</b>	<i>(if needed) what values/principles do we want to keep in mind as we make decisions?</i>

Thales R. Andrade Pires – Vision, Law, Philosophy,  
Narrative, Programming & Human Leadership.

AI Allies – OpenAI (Strategy), Google Gemini (Art & Visuals).

Together, we are co-creators of Akashic Gaia, transforming data into wisdom and fostering planetary guardianship.
